

DEVELOPMENT

PROVEN BEST PRACTICES

As a successful 21st-century business, you are operating in the age of the connected customer. In order to provide continued value to your external customers and internal teams, you need to always be looking for new ways to support modern enterprise application development that incorporates the end-users' evolving needs. They want high-quality software applications that are secure, compliant, and highly effective at performing their intended functions to deliver tangible business benefit.

At Melillo Consulting, we apply a comprehensive methodology, advanced technology knowledge, and proven best practices to all phases of the software development life cycle (SDLC)—from analysis, planning, and design to development, testing, deployment, and maintenance—to accelerate application delivery and support your digital transformation goals.

OUR EXTENSIVE DEVELOPMENT EXPERTISE INCLUDES:

- **Software development life cycle (SDLC):** With an infinite knowledge base across all phases of the software development life cycle, we'll help you automate and modernize your application deployment. We provide a fine-grain attention to detail across each stage of the SDLC to maximize efficiency throughout the process.
- **Performance testing:** Your software is only as good as its ability to function properly and perform according to your requirements. Leave that burden to us. Our team of development experts will complete extensive application performance testing on your software platforms to ensure they perform as expected—every time.
- **Security testing:** Security defects in the code are becoming more prevalent, particularly in the age of rapid software development. That's where we come in. Specializing in the highest level of code security testing, we will help you dramatically mitigate risk and ensure your enterprise, web, and mobile apps are free of vulnerabilities and protected against attacks.

Our team of application development pros will reduce waste and increase efficiencies across your entire development process, while ensuring your project stays on track and on budget. For more information about Melillo's development capabilities or to speak to an expert, [contact us here](#).

At A Glance

Since 1988, Melillo has been helping organizations power their business through technology. We offer a full range of complete IT solutions that address customers' on-premises, hybrid, and cloud needs, with advanced expertise in infrastructure, development, security, and data management. Serving a range of industries, including healthcare, finance, insurance, manufacturing, and other organizations, Melillo helps customers create and execute digital business acceleration strategies that lower costs, boost ROI, minimize risk, and ensure compliance.
