

## AIADAPT

### Power Your Infrastructure to Run AI

AI is everywhere. If you're not using it in your business, you'll fall behind as your competitors use it to outpace, outsmart, and outperform you. But the transition to an AI-enabled, data-driven organization can be a complex maze of technology and processes. It requires high-quality data, a strategic approach to deployment and integration, and ongoing optimization, or it won't perform as expected.

With MelilloSMART AIAdapt, we'll partner with you to help you introduce AI into your organization to power innovation, efficiency, and growth. Backed by a proprietary process and advanced AI technology expertise, we'll help you:

- Identify the essential data needed to fuel AI systems.
- Cleanse, organize, and enrich your datasets to make it AI-ready.
- Recommend and implement pre-built, deployment-ready platforms and products through partnerships with industry leaders like Dell CloudIQ for smart IT infrastructure management and HPE OpsRamp for contemporary AI-driven IT operations management.

### IMPROVE EMPLOYEE EFFICIENCIES

Using generative AI systems and tools, Melillo experts will strategically align to your processes and business goals so that your employees will be poised to:

- Create high-quality content faster.
- Engage in deeper trend analysis to fuel profitable decision-making.
- Automate repetitive tasks, freeing up bandwidth for high-value activities.

Using the AIAdapt process, Melillo helped a manufacturing company autoschedule preventive maintenance for its mechanical systems and increase batch yields, improving productivity by 100%, and a financial services firm automate suspicious activity reports and streamline their contract review processes yielding >50% boost in security and employee efficiencies.

### MelilloSMART

MelilloSMART helps organizations navigate evolving technology with confidence. Backed by 30+ years of expertise, we deliver solutions that boost efficiency, security, and compliance for better business outcomes.
