

MODERNIZE YOUR IT INFRASTRUCTURE WITH DELL AND MELILLO CONSULTING

As data becomes more ubiquitous, businesses need to find new ways to support traditional and modern workloads to ensure they work autonomously and collaboratively across all their IT environments. As a Dell Technologies Platinum partner with advanced knowledge in Dell's portfolio of solutions, Melillo can help you modernize, automate, and transform your data center using industry-leading server and storage technology.

Optimize Your Storage: PowerStore

Transform and mobilize any workload using today's revolutionary storage appliance, Dell PowerStore. Combining the advantages of cutting-edge storage hardware with the flexibility and simplicity of modern software design, PowerStore gives you:

- A data-centric design with scale-up and scale-out and a 4:1 data reduction guarantee.
- Intelligent automation that supports greater efficiency and cuts operating costs.
- An adaptable architecture that enables speed and mobility, so applications can run directly on the smart device.

Evolve Your Server Environment: PowerEdge

In order to power innovation to meet the demands of today's AI digital transformation and acceleration, you need a fast, secure infrastructure. With Dell PowerEdge servers, you get:

- Adaptive compute that can scale to address your data at the point of need.
- Autonomous compute infrastructure with intelligent systems that meet your parameters.
- Proactive infrastructure resilience with secure interactions and the ability to predict potential threats.

Backed by a team of IT pros holding the highest levels of certifications, Melillo can develop and deploy Dell infrastructure solutions that meet and exceed your business goals.
